

Tandem Axle Slider Line Saver

The **EZ Claw Tandem Axle Slider Line Saver** supports air and electrical hoses located under the frame on sliding tandem axle trailers. **The cable extends and retracts as the axles slide into position.**

Why buy this line saver?

Specialized Use

The Tandem Axle Slider Line Saver provides 72" of line travel, allowing axles to slide back and forth as needed.

Universal Fitment

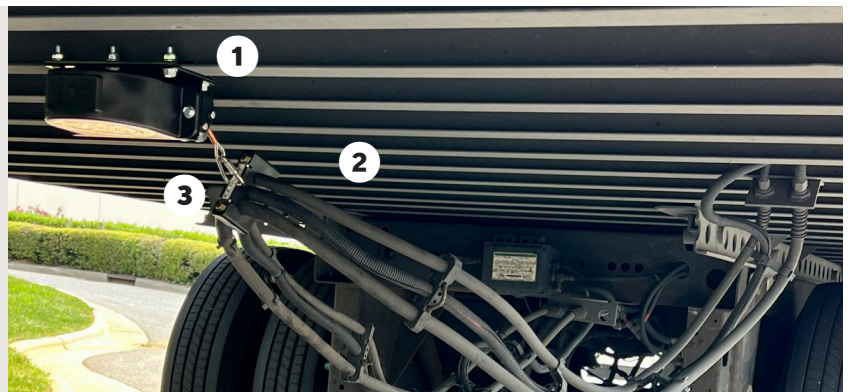

Bolts to aluminum or steel cross members up to 2.5" wide.

Weatherproof

Durable case and stainless steel components will hold up well to the elements: road spray, debris and salt.

Features:

- 1 Mounts **ahead of the axles**
- 2 Supports **40 lbs. of hoses**
- 3 Attaches to **hose and cable block**

Under Deck California Hookup Line Saver

The **EZ Claw Under Deck California Hookup Line Saver** accommodates a lower connection on tractors which have **plumbed their lines along the framerail to the tail.**

Why buy this line saver?

Appearance

Cleaner look on custom tractors and easier access to connections.

Weatherproof

Rust-resistant line savers are stronger than traditional springs and will hold up well to road spray and debris. ASTM Salt Testing Data available upon request.

Versatility

Can be fitted to several crossmember configurations: I beam, C or L channel or boxed channel.

Features:

- 1 Mounts under the trailer **ahead of the landing gear**
- 2 Supports **25 lbs. of hoses**
- 3 **Eliminates trip hazards** on the catwalk
